### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Brian Tollefson on 9/10/07.

2. The application has been amended as follows:

In claim 37, lines 1-2, "claim 33" has been changed to --claim 36--.

### ***Allowable Subject Matter***

3. Claims 33-61 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Claim 33 recites a microfluidic reaction support comprised of the following elements: fluid feed channels having a non-uniform cross section, fluid discharge channels having a non-uniform cross section, and reaction areas formed by connecting channels which connect the fluid feed and fluid discharge channels. The connecting channels are arranged in a side-by-side relationships and at an obtuse angle to both the fluid feed channels and the fluid discharge channels measured in a direction of fluid flow. See Figures 1A, 6 and 7A. The Examiner considers Zanzucchi to be the closest

prior art. Zanzucchi teaches a microfluidic device having fluid feed and fluid discharge channels that intersect to form reaction areas. The feed and discharge channels of Zanzucchi do NOT form an obtuse angle with the connecting channels that form the reaction areas. In addition, Zanzucchi does not teach or suggest non-uniform cross sections for the feed and discharge channels.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
